

# FAST™ Ballistic Mandible

## Ballistic Protection

The FAST Ballistic Mandible offers ballistic and blunt impact protection for all Ops-Core® FAST helmets equipped with Super High-Cut Skeleton ARC Rails and Super High-Cut Skeleton ARC Shims. Designed for ground, maritime, and mobility operations, the FAST Ballistic Mandible provides facial ballistic protection from frag and 9mm threats in a lightweight, low profile form factor. While the rigid carbon composite frame provides blunt impact protection, the mandible's flexible ballistic armor allows the user to obtain a solid cheek weld. The FAST Ballistic mandible is one-size-fits-all and quickly scalable, easily attaching to the helmet without occupying valuable rail space.

## KEY FEATURES

- Increased blunt impact and ballistic protection
- Lightweight design easily attaches to SHC ARC Shim
- Flexible Armor provides the ability to obtain a solid cheek weld
- Uninterrupted Field of View
- Compatible with any Ops-Core FAST Helmet equipped with the Super High-Cut Skeleton ARC Rails and Super High-Cut Skeleton ARC Shim
- SHC Skeleton Rails and SHC ARC Shims available as upgrade kit to any Ops-Core FAST Helmet

### Available Colors:

## SPECIFICATIONS

### Ballistic

- Ballistic Protection Frag:

Projectile	V50 BL(P) at 0° Obliquity
2 – Grain RCC	4,075 fps
4 – Grain RCC	3,450 fps
16 – Grain RCC	2,425 fps
64 – Grain RCC	1,700 fps

- Ballistic Protection 9mm: RTP 9mm FMJ V0 at 1,195 fps

### Blunt Impact

- Blunt Impact Resistance: 3 Impacts at speed of 8.66 fps
